C.D. Mee
MRM'95 Foreword 1

Chapter 1. Micromagnetics and hysteresis

L. He, W.D. Doyle, L. Varga, H. Fujiwara and P.J. Flanders
High-speed switching in magnetic recording media (Invited paper) 6

R. Davidson, S. Charap and R. Simmons
Vector combined Preisach model with a biaxial switching operator for simulation of unoriented thin-film media 13

G. Bottoni
Rotational hysteresis in particles for magnetic recording with different switching modes 16

A.P. Warren, C. Dean, P.R. Bissell, R.W. Chantrell and J.A. Gotaas
Noise time series simulation for a thin film recording medium 19

A. Stancu
Numerical implementation of mixed-type models for recording media magnetization processes 22

F. Vajda and E. Della Torre
A vector moving hysteresis model with accommodation 25

N.S. Walmsley, A. Hart, D.A. Parker, R.W. Chantrell and J.J. Miles
A simulation of the role of physical structure on feature sizes in exchange coupled longitudinal thin film 28

I. Klik and C.-R. Chang
Hysteresis of hexagonal lattice arrays 31

H. Hauser and P.L. Fulmek
Hysteresis calculations by statistical behaviour of particles of high density 34

M.A. Wongsam, R.W. Chantrell and P.W. Haycock
A Hamiltonian description of FMR in finite continuous media 37

K.M. Tako, M.A. Wongsam and R.W. Chantrell
Numerical simulation of 2D thin films using a finite element method 40

C.T. Teh, H.L. Huang and V.L. Sobolev
Azimuthal angle dependence of the structure and energy of domain walls 43

V.L. Sobolev and H.L. Huang
Magnetization dynamics in a medium with spatial dispersion of relaxation 46

L. Hua, J.E.L. Bishop and J.W. Tucker
Micromagnetic simulation of domain walls in iron films 49

G. Bottoni, D. Candolfo and A. Cecchetti
Temperature effects on time-dependent magnetic phenomena in recording media 52

G.D. Howells, R.J. Prance, T.D. Clark, C. Watkins and C. Vittoria
Imaging the magnetic properties of materials at the 1 μm length scale 55

G.N. Kakazei and N.A. Lesnik
The study of the perpendicular anisotropy in the nanocrystalline Ni and Co films 57

Chapter 2. Particulate media

K. Okamoto, Y. Okazaki, N. Nagai and S. Uedaira
Advanced metal particles technologies for magnetic tapes (Invited paper) 60

J.L. Cain, S.R. Harrison, J.A. Nikles and D.E. Nikles
Preparation of α-Fe particles by reduction of ferrous ion in lecithin/cyclohexane/water association colloids 67

P.T. Por, G.N. Coverdale, R.W. Chantrell, M.Th. Rekveldt, A. Hart and D.A. Parker
Theory of neutron depolarisation in particulate dispersions 70

K.J. Kim, R.R. Vedula, P.D. Glasgow, P. Jacobs and J. Farkas
Functionalized TPU for advanced media applications 73

0304-8853/96/$15.00 © 1996 Elsevier Science B.V. All rights reserved

F. Weingart, G. Brodt and A. Lehner
AB-block copolymers as dispersants in magnetic coating formulations 77

H.J. Richter and R.J. Veitch
MP tape for high density digital recording 80

D.E. Speliotis
Advanced MP^{++} and $BaFe^{++}$ tapes 83

P.T. Por, W.H. Kraan, J. Mes and M.Th. Rekveldt
Magnetic correlations between Co-modified γ-Fe_2O_3 particles in a solid matrix studied by neutron depolarisation in fields up to 0.5 T 86

S.R. McConochie, F. Schmidlin, P.R. Bissell, J.A. Gotaas and D.A. Parker
Interaction effects from reversal studies of single particles 89

C.-R. Chang and J.-S. Yang
Influence of packing factor on coercivity of particle arrays 92

M.P. Morales and K. O'Grady
Effects of dispersion on interaction and orientation in barium ferrite tapes 95

G. Zimmermann and K.A. Hempel
Remanence properties and critical radius of two single-domain spheres with a point contact 98

H. Keller, H. Rengel and P. Poganiuch
Oxidation protection of magnetic iron particles by ultrathin layers of silanes 101

Q.A. Pankhurst, G.R. Thompson, V.K. Sankaranarayanan and D.P.E. Dickson
Effect of ultrafine particle size and crystallinity breakdown on the ordered magnetic state in barium ferrite 104

K. Asano, S. Takatori and M. Memering
The magnetic switching volume of cobalt-modified iron oxides and its application to improved video properties 107

R. Müller and W. Schüppel
Co spinel ferrite powders prepared by glass crystallization 110

G. Bottoni, D. Candolfo, A. Cecchetti and D. Palmeri
Co-based metallic glass as a precursor for hard magnetic material 113

A.P. Warren, P.C. Hobby, G.N. Coverdale, R.W. Chantrell, R.G. Gilson and J.W. Thomas
Computer simulation of the orientation dynamics of a 2D array of fine magnetic particles in an opposed-poles orientation magnet 117

S.J. Greaves and K. O'Grady
Determination of pigment dispersion microstructure by magnetic measurements 120

P.M. Sollis, P.R. Bissell and R.W. Chantrell
The effects of texture and interactions on transverse susceptibility measurements of particulate media 123

Y. Yu and J.W. Harrell
FMR determination of damping constants in magnetic tapes 126

M.P. Morales, K. O'Grady, S. Betteridge and D.P.E. Dickson
Determination of out-of-plane orientation in barium ferrite media using Mössbauer spectroscopy 129

Chapter 3. Thin film media

X. Sui, M. Scherge, M.H. Kryder, J.E. Snyder, V.G. Harris and N.C. Koon
Barium ferrite thin-film recording media (Invited paper) 132

R.M.H. New, R.F.W. Pease and R.L. White
Lithographically patterned single-domain cobalt islands for high-density magnetic recording (Invited paper) 140

D.E. Laughlin, Y.C. Feng, D.N. Lambeth, L.-L. Lee and L. Tang
Design and crystallography of multilayered media (Invited paper) 146

S.Y. Chou and P.R. Krauss
Quantum magnetic disk 151

N. Honda, J. Ariake, K. Ouchi and S. Iwasaki
Preparation of Co–Cr films for perpendicular recording by sputter deposition at extremely high Ar pressures 154

J. Li, S.S. Rosenbluem, H. Hayashi and R. Sinclair
Magnetic and structural characteristics of sputtered barium ferrite thin films 157

Z. Wang and Y. Nakamura
A new type of GMR memory 161

X. Tang, G.-L. Chen, F. Sequeda and D. Chen
Temperature and seed layer effects on the magnetics of sputtered glass-ceramic disks 164

C.-L. Lin, T. Yeh, G. Wang, J.-C. Lin, J.M. Sivertsen and J.H. Judy
Structure and magnetic properties of CoCrTa films deposited on thin NiFe films 168

S. Kawakita, T. Sakurai, A. Kikuchi, T. Shimatsu and M. Takahashi
Effect of surface cleanness on the magnetic properties of CoNiCr and CoCrTa thin-film media fabricated using an ultraclean sputtering process 172

P. Dova, K. O'Grady, G.J. Sinclair, G.A. Jones and P.J. Grundy
Magnetic coupling in CoPtCr/Cr trilayer films 176

S.P. Fox and P.J. Grundy
Magnetic interactions and microstructure in CoCrPt discs 179

G.J. Sinclair, G.A. Jones and P.J. Grundy
Magnetic interactions in CoCrPt bilayer films 182

Z. Wang and Y. Nakamura
The magnetization reversal mechanism in soft magnetic film 187

L. Callegaro, E. Puppin, P.L. Cavallotti and G. Zangari
Electroplated, high H_c CoPt films: δM magneto-optical measurements 190

S. de Haan and J.C. Lodder
Reversal studies on sub-micron Co–Cr thin films by AHE analysis 193

H. Suzuki, P.R. Bissell, R.W. Chantrell and N. Kodama
In-plane time-dependent magnetisation and magnetic interactions of Co–Cr–Ta thin films 196

F.Y. Ogrin and P.W. Haycock
FMR studies of cobalt thin films deposited by MOCVD 199

R. Chandrasekhar and D.J. Mapps
The effects of samarium addition on CoCrTa-based thin films for magnetic recording 202

R. Chandrasekhar and D.J. Mapps
Properties of CoCrTa perpendicular films prepared by sputtering on platinum underlayer with different bias conditions 206

K. Sin, P. Glijer, J.M. Sivertsen and J.H. Judy
Electron energy loss spectroscopy studies of CoCrTaPt/Cr thin films for high-density longitudinal magnetic recording media 209

Y. Sano, H. Muraoka, I. Watanabe and Y. Nakamura
Effects of nitrogen addition to the CoCr recording layer of a double layered perpendicular rigid disk 212

M. Naoe and N. Matsushita
Deposition of single-layer $CoFe_2O_4$ and multilayer $CoFe_2O_4/\alpha$-Fe_2O_3 with large $4\pi M_s$ and high H_c using vacuum arc evaporation 216

W.H. Kraan, P.T. Por and M.Th. Rekveldt
Small angle neutron scattering in Co–Cr films in perpendicular and non-perpendicular transmission 219

I. Ouchi, I. Nakai and H. Maeda
XAFS studies of Co–Cr films 222

S.-C. Yu, J.-S. Baek, S. Nakagawa and M. Naoe
Underlayer thickness dependence of magnetic properties of $Co_{83}Cr_{17}/Co_{96}Zr_4$ double layer by FTS system 225

J. Ariake, N. Honda, T. Keitoku, K. Ouchi and S.-i. Iwasaki
Nb addition to Co–Cr media for perpendicular magnetic recording 228

S. Nakagawa, S. Tanaka and M. Naoe
Relationship between Ta content and soft magnetism of Co–Zr–Ta films for backlayers in perpendicular magnetic recording media 231

J. Nakai, A. Kikuchi, K. Nakatani, M. Hirasaka, T. Shimatsu and M. Takahashi
Microstructure and intergranular coupling in CoCrTa thin-film media fabricated using an ultraclean sputtering process 234

A. Kikuchi, I. Okamoto, J. Nakai, S. Kawakita, T. Shimatsu and M. Takahashi
Intergranular coupling and recording properties of CoCrTa and CoNiCr thin-film media fabricated using an ultraclean sputtering process 238

T. Shimatsu, D.D. Djayaprawira, A. Endo, N. Iwata, M. Takahashi and T. Wakiyama
Intergranular magnetic coupling in CoNiCrPt and CoCrTaPt thin-film media characterized by the temperature dependence of the rotational hysteresis loss 242

T. Shimatsu, D.D. Djayaprawira, M. Takahashi and T. Wakiyama
Effect of Pt on the magnetic anisotropy and intergranular exchange coupling in $(Co_{86}Cr_{12}Ta_2)_{100-x}Pt_x$ and $(Co_{62.5}Ni_{30}Cr_{7.5})_{100-x}Pt_x$ thin-film media 246

H. Matsuda, I. Takasu, D. Kim, O. Takano and P.J. Grundy
Magnetic recording properties of electrolessly deposited NiXP/CoReNiMnP double layer media 250

T.K. Lyakhovich and G.N. Kadykova
Coercivities of different recording media types for ion-beam-deposited and annealed samples 253

T. Ishiguro, T. Sato, T. Iwashita, S. Yamada, Y. Ichinose, T. Shinohara, M. Tobise and H. Hagiwara
Pole density distribution in CoCrTa/Cr sputtered thin film media and their magnetic properties 256

Chapter 4. Metal evaporated tape

S.B. Luitjens, S.E. Stupp and J.C. Lodder
Metal evaporated tape: state of the art and prospects (Invited paper) 261

B.K. Middleton, J.J. Miles and S.R. Cumpson
Models of metal evaporated tape (Invited paper) 266

T. Kawana, T. Takeda, T. Uchimi and K. Sato
Archival stability of metal evaporated tape 273

S.E. Stupp
Surface erasure effect at larger easy-axis angles in ME tape 276

A.H.J. Immink, M.D. Bijker, L. Abelmann and J.C. Lodder
Interaction in double layered ME tapes 279

K.C. Cho, C.Y. Moon and Y.J. Shim
Change of induced anisotropy and magnetic properties due to evaporation conditions in metal evaporated tape 284

G. Zimmermann and K.A. Hempel
Comparison of the magnetization reversal of Hi-8 ME and MP videotape 286

C. Sürig and K.A. Hempel
Magnetization processes and ferromagnetic resonance of Hi-8 recording media 289

E.O. Samwel, D.B. Bijl, J.C. Lodder and Th.J.A. Popma
Intrinsic angular investigations on metal evaporated tapes 292

G. Bottoni, D. Candolfo and A. Cecchetti
Effect of the coupling between Co and CoO in metal evaporated tapes 297

S.E. Stupp and J.P.C. Bernards
Inter-layer variation in the magnetic properties in multi-layer ME tapes 300

A. van der Graaf, H. Fredrikze, M.Th. Rekveldt and S.E. Stupp
Polarized neutron reflectometry on a two-layer ME tape 303

P.T. Por, M.Th. Rekveldt and W.H. Kraan
Determination of the magnetic structure of metal-evaporated tape by small-angle neutron scattering 306

T. Pan, G.W.D. Spratt, L. Tang and D.E. Laughlin
Magnetic properties and microstructure of evaporated Co oxide tape media 309

Chapter 5. Tribology, recording and head materials

J.L. Sullivan
The tribology of flexible magnetic recording media (Invited paper) 312

B. Bhushan
Macro- and microtribology of magnetic rigid-disk storage devices (Invited paper) 318

M.S. Hempstock and J.L. Sullivan
A study of the mechanical and magnetic performance of metal evaporated tape 323

H. Tian and J.J.K. Lee
Effect of disk surface contours on head flyability 329

H. Kondo, Y. Hisamichi and T. Kamei
Lubrication of modified perfluoropolyether on magnetic media 332

H.J. Richter and R.J. Veitch
A reconsideration of length loss effects 335

F. Obernosterer and W.F. Oehme
Pulse noise in thin film disk recording systems 338

I. Tagawa, A. Takeo and Y. Nakamura
Numerical analysis of noise and interparticle interaction in perpendicular magnetic recording media 341

B. Tan, D.J. Mapps, G. Pan and P. Robinson
A new servo method using servo layer and transverse MR head for submicron track servo on hard computer disks 345

S. Casey, E. Hill, J. Miles, P. Sivasamy, K. Birtwistle, B. Middleton, J. Chapman and J. Rose
A study of PtCo films used for longitudinal recording 348

H.J. Blythe and V.M. Fedosyuk
Thermoremanence and zero-field-cooled susceptibility measurements of electrodeposited granular CuCo alloys 352

J.M. Williams, H.J. Blythe and V.M. Fedosyuk
An investigation of electrodeposited granular CuFe alloyed films 355

W.Y. Lai, C.Y. Pan, Y.Z. Wang, M.L. Yan, S.X. Li and C.T. Yu
Giant magnetoresistance effect observed in Fe/Mo superlattices formed by magnetron sputtering 358

Chapter 6. Magneto-optics

R. Atkinson and M. O'Neill
Giant polar MO Kerr effect in high reflectance multilayer enhanced structures 361

G.N. Phillips, K. O'Grady and R.W. Chantrell
An analysis of magnetic viscosity in MO films – I: experimental 364

J.S. Earl, A. Lyberatos, R.W. Chantrell and K. O'Grady
An analysis of magnetic viscosity in MO films – II: Simulation 367

J.P.C. Bernards, D. Raasch, G. Much and C. Clausen
Magnetic properties of exchange coupled layers for magneto-optical recording 370

L. Bouet, P. Tailhades and A. Rousset
Co–Mn cation-deficient ferrite thin films: interesting ways to tailor their magneto-optical properties 373

S. Becker, M. Kratzer, H. Rohrmann and K. Röll
Influence of nitrogen surplus in SiN coverlayers on MO media 376

B. Liu and W.W. Clegg
Computer modelling of spatial temperature gradient dependence of magnetic field modulation in magneto-optic recording 379

B. Liu and W.W. Clegg
Modelling of boundary regularity and thermo-magnetic writing process of magneto-optic recording 382

P.-Y. Liu and H.-P.D. Shieh
Center aperture detection on magnetically induced super resolution magneto-optical disks 385

T. Schrefl and J. Fidler
3D calculation of magnetization processes in Co/Pt multilayers 389
